New Year Offers from TME Save Money on High Temperature Data Loggers

TM Electronics now offer a low-cost high temperature data logger for harsh environments - industrial dishwashers, washer disinfectors, pasteurisation and thermal disinfection.

For just £185 (including software) this compact, submersible logger is robust, waterproof and withstands temperatures of over 100°C. Each additional logger is priced at just £115.

With a high-visibility case and fast-response external probe, the logger records actual temperatures achieved within the equipment, which can then be downloaded to computer via a USB or serial download pad. This 'wireless connection' eliminates the need for sockets with waterproof caps which can easily be lost or forgotten.

Other great selling points include

- Waterproof to 15m
- 32,000 reading capacity
- User-programmable logging interval
- 2 user-programmable alarms
- Delayed and trigger-start options
- 3 stop options
- Low battery warning

For more information, or to place an order, contact one of TME's helpful sales team on +44 (0)1903 700651
