TME LAUNCH NEW SOLO CATERING THERMOMETER ADVANCED FEATURES - AMAZING VALUE – A THERMOMETER FOR LIFE

Temperature specialists, TM Electronics (TME) launch a new advanced handheld thermometer for caterers during **National School Meals Week 9th-13th November**.

Managing Director, Tom Sensier says: *“Our new SOLO represents amazing value for money, offering caterers advanced features, green options and the unique opportunity to buy a thermometer for life.”*

The new SOLO with integral needle probe boasts a number of advanced features, without compromising on the unique selling points that have already proved popular with professional chefs and caterers in the catering, hospitality and food processing industries.

Advanced features

- new super-strong construction on swing-out probe arm
- improved water-resistance
- belt holster or wall-mount facility
- help going green - rechargeable battery options
- optional service agreements – a thermometer for life

The SOLO remains the most ergonomic handheld thermometer on the market, thanks to its unique face-on display, quick-view temperature symbols and super-fast response time. This compact handheld consistently punches above its weight when it comes to quality; with an accuracy of $\pm 0.5^{\circ}\text{C}$ across its entire measurement range, it's difficult to beat. The SOLO is also the only handheld thermometer on the market to offer a practical cost-effective method of preventing cross-contamination. Every thermometer contains **as standard** a variable colour band, which can be pre-set by the customer - making the expense of ordering multiple thermometers in different colourways a thing of the past.

Amazing value

TME is continuing to hold the SOLO's £45 price tag – making it one of the most affordable quality handhelds available today.

For more information or to purchase your SOLO direct visit the TME e-commerce website at www.tmelectronics.co.uk or contact sales@tmelectronics.co.uk 01903 700651 ends.
